Hints to help you measure:

When measuring for your cabinet, measure the height (H), the length (L) and the depth (D) of your heater. Include any pipes when measuring the length.

In many cases, baseboard heaters sit in front of the baseboard molding. In order to clear the trim, only the top of our covers extends to the wall beyond the depth of the end panels.

In the case of two baseboard units on perpendicular walls that meet in the corners, please contact us for instructions.
